Delivery Method

Design Build

JM Olson Corporation adds to its Design Build portfolio with the Auburn Financial Center. This project is comprised of two ten story commercial office buildings and a five story parking structure all located on a 6.927 acre parcel. The project site is located on the east side of Five points Drive, between University Drive and Squirrel Road.

Each building will provide over 300,000 SF of class "A+" office space with the highest quality finishes on all materials. The project also houses a state of the art conference center, and fine dining options for employees, visitors and general patrons.

This project is designed as a LEED certified structure and will be a Smart Building as well.
