Cleveland, OH 44122
Frank Barnett
(216) 464-8600

Project Size

65,266 SF

Project Cost

\$8,000,000

Completion Date

September 1998

Delivery Method

Construction Management

Construction Management services were provided by the JM Olson Corporation for this new three story 65,266 SF assisted living facility. The building features 106 apartment style units and 26 skilled care/Alzheimer units. Residents also have access to medical care centers, and full dining and recreational areas.

The functional H-shaped, structural steel framed complex boasts a brick and vinyl clad facade, and arched as well as rectangular and rounded windows. The "Town Mall" design of the complex provides residents with screened in porches, benches, and charming simulated storefronts. Additional elements of the campus include a walking path, large parking areas, precast decking, and a storm water retention pond.

"...My compliments to you and the JM Olson team for being so well prepared for the pre-construction meeting with Northville Township. I believe that each of the Township's representatives were impressed that we had our checklist package in such excellent order."

Stephen C. Smith, Project Director
