Fanning/Howey Associates  
1290 W. Grand River  
Willimaston, MI 48895  
Jim Mumby  
(517) 655-1183

### Project Size

32,000 SF

### Project Cost

\$7,028,330

### Project Team

Tom Beauchamp, Superintendent

### Date Completed

September 2004

### Delivery Method

Construction Management

As the City of Dearborn Heights continues to keep pace with technology, they have decided that an effort was needed to improve their library services to the citizens of their community. Two new facilities were designed to replace their existing and aging structures with new state-of-the-art technology.

JM Olson Corporation provided Construction Management services for the Caroline Kennedy Library. This project included extensive preconstruction services, and JM Olson worked closely with the project architect to provide detailed budget.

The 32,000 SF project featured computer upgrades and other various technological elements to provide library visitors with the available modern research tools. The entire facility was also equipped for WIFI access.
