Vicky Patrick, project Accountant

Delivery Method

General Contracting

This four phase project is located on the Detroit Riverfront and boasts a two story glass and metal structure that will house the Detroit Wayne County Port Authority (DWCPA) staff. The location is also designed to accommodate cruise ship passengers as they enter one of Detroit's numerous ports. This project, which is located within a confined space, will also include a 425 foot wharf that is designed and under construction to accommodate 4 different types of leisure ships.

The project is situated along the Detroit Riverwalk and will connect the east and west construction areas of the Detroit Riverwalk project upon its completion.
