**Date Completed**  
September 2007

**Delivery Method**  
General Contracting

The Family Aquatic Center, located within the Lower Huron Metro Park, was designed to be a relaxing and entertaining destination for families seeking escape from the summer heat & sun. The park's activity areas include a lazy river, a wave pool, and a water play pad. The project also included the construction of administrative buildings, a bath house, and a pool mechanical building.

This project featured more than one mile of underground piping for the pools, electrical and plumbing, and site drainage. An on site storm sewerage system includes bioswale and detention areas.
