Cost

\$3,135,000

Date Completed

May, 2002

JM Olson Corporation installed numerous E-Ticket counters throughout the new terminal at Detroit Metropolitan Airport. E-Ticket counters allow passengers to reduce check-in times, enter their flight-confirmation number into the computer avoiding the airline ticket office and print out their boarding pass themselves.

This was a fast tracked construction services project which included 15,000 sf tenant build out for Continental Airlines without interruptions to Airfield operations. This facility consists of office space and shop areas for ground support at West Midfield Concourse.
