Size

35,000 sf

Cost

\$425,000

JM Olson Corporation provided general contracting services for a \$425,000 renovation of the Ritz Carlton Hotel facilities in Dearborn, Michigan. The project was scheduled and completed over a two month period, while the hotel remained in operation.

The many aspects of this project included renovations to meeting and restrooms throughout the structure, as well as new flooring, new ceilings, fresh wall finishes, and upgraded lighting and sound systems.

Due to the accelerated schedule of the project, JM Olson Corporation composed an intense agenda that coordinated the efforts of all parties involved. The commitment to work closely with the owner, architect and subcontractors ensured satisfaction and quality workmanship on every level of the construction phase.
