Joann Brooks, Project Accountant

Date Completed

September 2005

Delivery Method

General Contract

In 2005 JM Olson Corporation was awarded the contract for a renovation and addition project at the Bradner Library on the campus of Schoolcraft College. This project included the complete interior demolition of the existing library facilities, and approximately 5,000 SF addition to the building. Completed entirely between the end of the Winter Term and the start of the college's Fall Term, the construction time frame for this project was extremely compressed. Close coordination between the Owner, Architect and JM Olson Corporation was key in the successful completion of this facility.
