Date Completed
Under Construction
August 2008

Delivery Method
Construction Management

JM Olson Corporation provided Construction Management services for this three story medical office building. Located on a site with extensive soil condition problems, JM Olson Corporation leveraged their past experience with site remediation to accomplish the owner's construction goals on schedule.

This 30,000 SF structure will house various medical offices, and includes facilities for a portable MRI machine, and x-ray rooms. The majority of space will be occupied by patient exam rooms, but this structure also features physical therapy facilities to accommodate the needs of all patients.
