Suite 180, North Tower
Atlanta, GA 30309
(404) 962-9683

Project Size

75,000 SF

Project Cost

\$2,500,000

Delivery Method

Construction Management

JM Olson Corporation provided Construction Management services for the renovation of Lee Common Areas within the 75,000 SF Westland Mall Shopping Center. The scope of work for this project included demolition of all existing architectural finishes, such as false beams, trellises, and skylight soffits. The interior lighting for the entire floor area was re-designed and re-installed to meet the need of the existing common area tenants.

The architectural design for the space incorporated suspended canvas sails in the Hudson's and Sears Center Courts. Stainless steel towers rising 20 feet about the floor were constructed to compliment and accent the sails. In order to accommodate the retailers and consumers needs, the entire renovation project was completed during the busy holiday shopping season during the third shift.
