Size

84,000 sf

Cost

\$1,000,000

JM Olson provided award winning construction services for the removal and installation of the Crash Barrier Building's metal cladding façade while the building remained fully operational. Working in 1,000-foot long increments during harsh winter months, JM Olson's team utilized temporary exterior walls while installing permanent metal cladding and brick wainscott.

Ford Motor Company honored JM Olson's project team with the 1999 GTO Achievement Award that recognizes the project with the **most return on investment**.

Additional project elements included site work and dimensional analysis.
