JM Olson provided fast-tracked services for the renovation of the existing Kresge Foundation Building into a new 10,000 sf, Dialysis Center. This new state-of-the-art facility houses 32 hemodialysis stations, two isolated hemodialysis stations, examination rooms, lobby/reception area, and administrative offices. Special consideration was given to the equipment installation, mechanical and electrical systems and Reverse Osmosis (R.O.) Water systems.
