23,000 sf

Cost

\$3,000,000

Date Completed

September, 1995

JM Olson Corporation provided general contracting services for the renovation of existing courtrooms and lobby / atrium renovation for Oakland County Courthouse in Pontiac.

While the courthouse renovations were significant, the lobby renovation was most dramatic. This two-story architecturally striking area was designed to allow for flow of tremendous amounts of natural light.

The project challenge during construction was not disrupting the thousands of visitors to the courthouse each day.

“I would like to express my gratitude to your staff for their cooperation and professionalism in the construction of the North Lobby Expansion project. To accomplish this highly visible construction project with minimum inconvenience and disruption to the public and staff is a statement of their expertise. Thank you again for a job well done.”

Gregg Wm. Doty, Facilities Engineer, Retired
