### Size

55,000 sf

### Cost

\$4,200,000

### Date Completed

October, 2002

Under a design/build contract, JM Olson Corporation provided construction management services for a new, four-story, 55,000 sf office building.

This magnificent building houses office space, conference areas, kitchen areas and parking for 213 vehicles. This steel framed brick office building with punched windows was designed with a European flair in mind.

Located on an unregulated wetland site, more than 140,000 cubic yards of wet dirt were removed and replaced with engineered fill before any building took place.
