Size

7,400 sf

Cost

\$1,600,000

The mission of Washtenaw United Way is to generate and allocate resources to help individuals and families build better lives and stronger communities. This non-profit organization and its predecessors have helped to provide a safety net of health and human services to keep their community strong. Unfortunately, two years ago their two-story building was damaged by fire, but things are looking up for the non-profit organization. Now, with the insurance settlement and sale of the building to provide funding, JM Olson Corporation was hired to build their new 7,400 sf home.

The modest, yet elegant facility will be built on the front lawn of the old building. The one-story office and community meeting center serves as the organization's headquarters. JM Olson is combined three kinds of roofing for the building including a vaulted standing seam roof over the conference wing. An additional feature of the new building is an outdoor patio which forms part of the detention pond.
